

I benefit from Satellite Radio and its traffic and weather. XM provides a service that is not available anywhere else because of the tight government regulations over the airwaves. Freedom of speech is non existant on regular radio. I choose to pay for Satellite radio so that I can listen to content that is broadcasted in the way that the broadcaster ment to send it. I support free speach and I do not support the government regulating what is said on the airwaves.

Reject NAB's petition 04-160
